LANE VISIBILITY

Intermodal is the fastest growing mode of transportation. Intermodal transport involves freight being moved in an intermodal container via a combination of rail and truck, without any handling of the freight itself when changing modes. Intermodal shipping reduces cargo handling, improves security, reduces damages and loss, and allows the freight to be transported faster. Taking advantage of our established relationships with major intermodal asset providers means you experience flexibility, reliability and cost-efficiency.

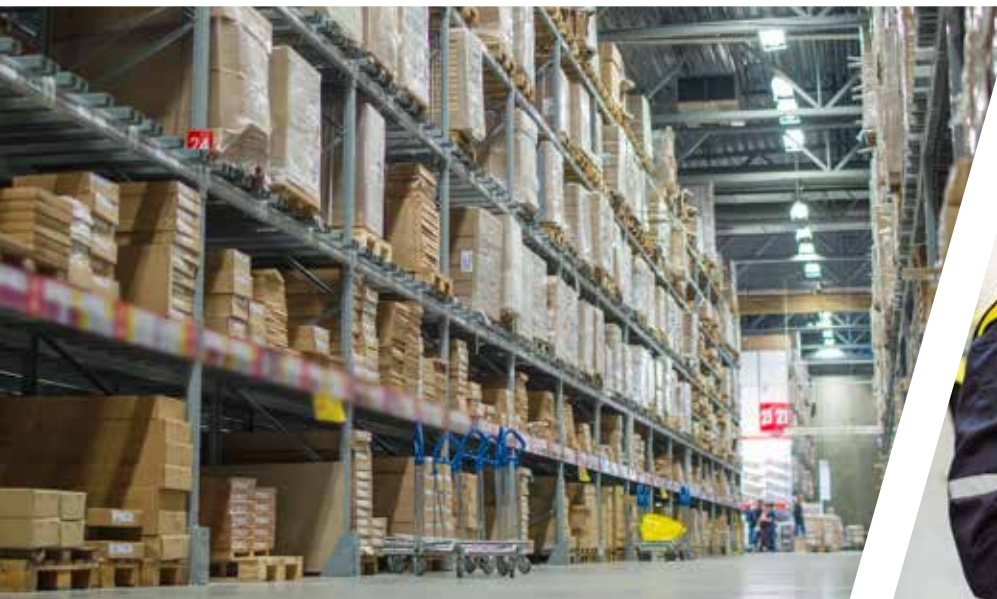

As one of the remaining true Intermodal providers, we provide intermodal services to some of the largest companies in the U.S. We work with you to create custom transportation that is flexible and efficient for a wide variety of businesses in North America. Additionally, we offer a large array of services to tailor your intermodal ocean freight that help to minimize your overall cost, reduce your total transit time and effectively manage your transportation.

Domestic Warehousing

Commerce Express provides extensive warehousing services including storage, “pick and pack”, order fulfillment, and distribution. Moreover we can integrate your inbound and outbound shipments through any one of our global hubs. This eliminates double handling of your product and simplifies the supply chain process. Logistics made simple.
